

### **Manholes...**

LFM manufactures fiberglass enclosures for air relief valves, or ARV manholes. ARV manholes are lightweight, stackable, and can be easily shipped to job site locations. LFM ARV manholes are designed to the same standards as our sanitary sewer manholes.

### **Inlet Hubs...**

LFM makes field connections simple with our inlet hubs. LFM can custom manufacture inlet hubs to a given radius to bolt to the side of manholes, wetwells and basins. A variety of stub outs can be factory laminated.

### **Metering Manholes...**

LFM manufactures fiberglass metering manholes for a wide range of flow services. Traffic-rated and nontraffic-rated fiberglass covers are available. LFM's fiberglass metering manholes include many different flumes as an integral part of the unit including Parshall and Palmer Bowlus Flumes.
